

The Jordan Institute

a science-based, non-advocacy, New Hampshire non-profit.

Jordan Vision for CTAP: To help NH retain a high quality of life by transforming development practices at the site, community, and regional scales.

Plan for 2005-2010: To change development practices in our communities by:

- ✓ Declaring a vision of what is possible
- ✓ Creating development choices/options that retain rural character
- ✓ Providing evidence-based information to inform development choices
- ✓ Providing access to cross-discipline expertise
- ✓ Providing practical technical assistance to help change land use practices (master plan, zoning, subdivision, site plan review, voluntary practices, incentives)
- ✓ Encouraging citizen participation in decision-making
- ✓ Ensuring access to financial resources

Outcomes:

- 1) Land use guided by integrated design and development practices
- 2) Efficient use of energy, resources, and materials
- 3) Reduced pollution
- 3) Improved public and individual health

A Decade of Progress

- NH Comparative Risk Project (1994-98)
- NH Minimum Impact Development Partnership (1998-2003)
- Integrated Design/Integrated Development Conference Series (2003-)
- 3i Solutions (2003-)
- NH Partnership for High Performance Schools (2005-)
